

CPCRN Trainee Learning Series 2025

The CPCRN is proud to host 4 Learning Sessions, specifically designed for trainees, by trainees, in partnership with TUTOR-PHC.

Implementation Science in Primary Care Research

Session Description

This Learning Session focuses on Implementation Science in Primary Care research, drawing upon the expertise of Dr. Noah Ivers who is acknowledged as a world leader in providing performance measurement and feedback to clinicians to support quality improvement. He works with a range of clinical experts and broad multidisciplinary teams to systematically develop and evaluate initiatives that improve quality in primary care. We will also hear from trainees who will present their approaches related to implementation science, providing concrete examples for Dr Ivers to guide a discussion on methods and challenges in the field.

Session Objectives

- To review what implementation science is (and why it's important) and common theories/models/frameworks used in the field.
- To explore how implementation science can be used in primary care research, with examples from a Canadian context.

18 March 2025 / 12 - 1 PM ET / Zoom Meeting

EXPERT: Noah Ivers, MD, PhD, CCFP

-Scientist, Women's College Hospital Research and Innovation Institute
-Innovation Fellow, Women's College Hospital for Health System Solutions and Virtual Care
-Family Physician, Women's College Hospital
-Associate Professor, Department of Family & Community Medicine, University of Toronto

TRAINEE: Daphne To, BSc, DC, MSc

-PhD Candidate, University of Toronto
-Trainee, Women's College Hospital Institute for Health Systems Solutions and Virtual Care
-Chiropractor
-Assistant Professor, Canadian Memorial Chiropractic College
-Research: Developing an intervention to support community pharmacists in delivering minor ailment services more effectively

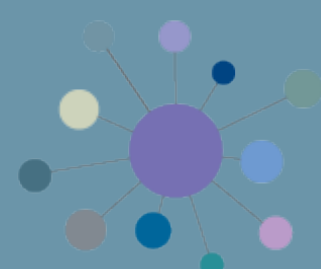

TRAINEE: Fikadu Yehualashet, BSc, MPH

-PhD Candidate, Queen's University
-Nurse clinician and public health professional
-Assistant Professor, University of Gondar, Ethiopia
-Research: Feasibility of the diabetes self-management coaching programs in primary care

TRAINEE: Andréanne Bernier, RN, MSN

-PhD Candidate, Université du Québec en Abitibi-Témiscamingue (UQAT)
-Registered Nurse
-Assistant Professor, UQAT
-Research: Integration of nurses into primary care settings for the management of chronic pain, aiming to optimize their role in interdisciplinary teams
